- **** Maximum 16 characters including spaces.

CHART II
GROUP CONFIGURATION
FOR

PARTIAL ARM AND GROUP ARM/USER

NOTE The Partial Arm and Group Arm/User program is designed for single subscriber premises partitioning. It is not recommended for multiple subscriber installation.

Prior to actual programming use this Chart to set up and identify the zones for each group

1. Select Group Number.
2. Assign zones to Group by placing "Y" in corresponding zone box.
3. Assign description (name) for Group with maximum 16 characters including spaces.
4. Assign Open and Close Code (if used) for Group.

	ZONES																DESCRIPTION	OPEN CODE	CLOSE CODE	COMMON
	1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16

If Group Arm/User is selected:

- A. With entire system disarmed, only 24 hour violated zones (if programmed for display) will display.
- B. With any group in the system armed, no violated zones will display.
- C. Closing signals begin transmission after exit delay time has expired.
- D. Only one group can be programmed as a "Common" group.
