**254****CONTACT I.D. FORMAT**

Address 194 (section 33, key [9], [10])

If **CONTACT I.D. (ALL CODES)** is selected, (address **194**, key **[10]**), all addresses from **088** to **193** programmed or not, will report Contact I.D. event codes. (Refer to "Contact I.D. event code" list, Installation Manual.) Programming is not required for these addresses when **ONLY** this format is used.

If **CONTACT I.D. (SELECTED CODES)** is chosen, (address **194**, key **[9]**), all addresses from **088** to **193** programmed with ANY VALUE except **[2ND]** **[2ND]** will report Contact I.D. event report codes. (Refer to "Contact I.D. event code" list, Installation Manual.)

(Potential application: to report in Contact I.D. format to one central station number, and 4/2 format to the second. Use 4/2 format to program addresses. At address 194, select a 4/2 format for one telephone number, and Contact I.D. format for the second. The software will automatically convert the 4/2 codes to Contact I.D. codes when transmitting them to the second receiver.)

## **KEY ACCESS PROGRAMMING**

Several panel features can be programmed quickly, without entering addresses or programming section numbers. Select "one-key access" programming mode by pressing **[ENTER]**, followed by the installer, master or user 1 code (depending on the feature you wish to activate, only certain codes will be functional). Then press the single key (listed below) corresponding to the feature you wish to enable.

### **key**

- [9]** "Auto arming" time program (accessible to master and user 1 only)  
Enter two digits (00 to 23) for hours + 2 digits (00 to 59) for minutes + **[ENTER]**.
- [MEM]** "Panel time" and clear "trouble 8" (all 3 codes)  
Enter two digits (00 to 23) for hours + 2 digits (00 to 59) for minutes + **[ENTER]**
- [BYP]** Test report (all 3 codes)  
Reporting is enabled at address **206** keys **[11]**, **[12]**. A value must be entered at address **175**, and both telephone and account numbers must be programmed.
- [TRBL]** Call Espload via telephone (all 3 codes)  
Panel and PC ID numbers (addresses **001-004**) and PC download phone number (addresses **060-067**) must be programmed.
- [AWAY]** Answer Espload (all 3 codes)  
This feature is available when using the ADP-1 adapter. In Espload, "blind dial" must be activated in "modem setup" section, and panel phone number programmed (work also without ADP-1).
- [STAY]** Cancel communication attempts (master code and user 1 can only stop calls from/to Espload)  
Until next reportable event (installer code - all communications)
- [STAY]** Reset to default panel settings (installer code only)  
Connect reset jumper. Press **[ENTER]** + installer code + **[STAY]**, remove reset jumper.
- [2], [6]** Installer test mode (installer code only)  
In installer test mode, a confirmation beep (intermittent) indicates test is "on", a "rejection" beep (long) indicates test is "off". The bell will squawk during walk testing to indicate opened, functional zones.
- [2], [7]** Streamlined value entry (installer code only)

Note: When communicating with Espload, it is impossible to enter programming mode.

## **CHANGE MASTER AND USER CODES**

(default master **474747**)

**[ENTER]** + master code + code number (2 digits, 00 to 16) + new code (4 or 6 digits, 0 to 9) + **[ENTER]**.  
Use **[2ND]** to erase a code.

**Master code = 00 ([10][10])** Full access to all system functions.

**User codes = 01-16** (01 - can modify access codes. All user code priorities can be programmed at addresses **200**, **202**, **204** with the installer code.)

Note: **[2ND]** key flashes if location is empty.

To erase a code: **[ENTER]** + Master + Code Number + **[2ND]** + **[ENTER]**
